

Are you our next Automotive Interior Designer!

Our BTS Engineering Lab in Stockholm is now looking for an Automotive Interior Designer.

Our lab is a highly creative, multidisciplinary, and international think tank, dedicated to envisioning strategic product designs and turning them into innovative, working solutions.

We are a design team based in Stockholm, Sweden, a concept satellite studio for a global tech leader in consumer electronics. Our studio is relatively small, so the candidate must display a sensitivity to the dynamics of working in close coupled teams.

In your job you will add an interior designer with a demonstrated expertise and talent to the team. You will get to work on operational and innovation projects across a variety of future-oriented product, components and experiences.

Responsibilities

- Conduct research activities.
- Generate dynamic, beautiful and innovative design solutions that contribute to truly engaging products and experiences.
- Develop 3D surface models of high complexity and sophistication that are aesthetically accurate.
- Contribute to design presentations.
- Participate in team design reviews and share opinions and inputs.
- Work in collaboration with our other global studio's.

Key Skills and Capabilities:

- High calibre Photoshop skills are a must, with proficiencies in hand sketching, complex 3D surfacing and 3D rendering also required.
- A high degree of enthusiasm and knowledge about design across the commercial spectrum; Consumer electronics, furniture, fashion, product, UI, UX and all things transport/mobility related.
- Capability in translating and also generating brand tone, values and identity through the design of products, components and experiences.
- Have a very strong capacity for ideation, critical thought, information synthesis and problem-solving.
- A level of self-motivation and initiative, and an eagerness to learn and work collaboratively, with a genuine ability to take direction at all times.

Qualification and Experience Requirements:

- Education background: Bachelor degree or higher diploma in a relevant design course.
- At least 3 to 8 years of experience within an Automotive OEM or equivalent.

Please send your personal application letter, resume and mini portfolio in PDF format.
